Problem Statement:

You are given an m x n integer grid accounts where accounts[i][j] is the amount of money the i^{th} customer has in the j^{th} bank. Return *the wealth that the richest customer has*.

A customer's wealth is the amount of money they have in all their bank accounts. The richest customer is the customer that has the maximum wealth.

Example 1:

Input: accounts = [[1,2,3],[3,2,1]]

Output: 6

Explanation:

1st customer has wealth = 1 + 2 + 3 = 6

2nd customer has wealth = 3 + 2 + 1 = 6

Both customers are considered the richest with a wealth of 6 each, so return 6.

Example 2:

Input: accounts = [[1,5],[7,3],[3,5]]

Output: 10

Explanation:

1st customer has wealth = 6

2nd customer has wealth = 10

3rd customer has wealth = 8

The 2nd customer is the richest with a wealth of 10.

Example 3:

Input: accounts = [[2,8,7],[7,1,3],[1,9,5]]

Output: 17

Program:

```
class Solution {
   public int maximumWealth(int[][] accounts) {
      int maxWealth = 0;

      // Loop through each customer
      for (int i = 0; i < accounts.length; i++) {
         int currentWealth = 0;
```

```
        // Sum up all bank accounts for this customer
        for (int j = 0; j < accounts[i].length; j++) {
            currentWealth += accounts[i][j];
        }

        // Update max wealth if current is greater
        if (currentWealth > maxWealth) {
            maxWealth = currentWealth;
        }
    }

    return maxWealth;
  }

  // Quick test
  public static void main(String[] args) {
    Solution sol = new Solution();

    int[][] accounts1 = {{1,2,3},{3,2,1}};
    System.out.println(sol.maximumWealth(accounts1)); // Output: 6

    int[][] accounts2 = {{1,5},{7,3},{3,5}};
    System.out.println(sol.maximumWealth(accounts2)); // Output: 10

    int[][] accounts3 = {{2,8,7},{7,1,3},{1,9,5}};
    System.out.println(sol.maximumWealth(accounts3)); // Output: 17
  }
}
```

1.Input: accounts = [[1,2,3],[3,2,1]]

Output: 6

2. Input: accounts = [[1,5],[7,3],[3,5]]

Output: 10

3. Input: accounts = [[2,8,7],[7,1,3],[1,9,5]]

Output: 17
